Product Summary

The 98078 12V Regulated Cable For Yeti Lithium Battery Packs is a must-have Goal Zero accessory. This cable solves the problem of low-battery voltage appliance shut-downs in appliances that are used to having 12V electricity from lead-acid batteries. It is used to regulate the APP output of a Goal Zero Yeti Lithium to a consistent voltage, improving compatibility with 12V-powered devices.

Product Description

The 98078 12V Regulated Cable For Yeti Lithium Battery Packs is a must-have Goal Zero accessory. This cable solves the problem of low-battery voltage appliance shut-downs in appliances that are used to having 12V electricity from lead-acid batteries. It is used to regulate the APP output of a Goal Zero Yeti Lithium to a consistent voltage, improving compatibility with 12V-powered devices.

NOTE: Not for use with lead-acid Yetis.

The Problem Solved...

Lithium batteries operate at a slightly lower native voltage than standard lead-acid batteries. 11.1V for some lithium chemistries, while lead-acids are approx 12.7V when fully charged. So, some 12V appliances will read the lithium battery voltage and assume that the battery is low and will shut-down or sound a low-battery alarm. Both situations are annoying. You might have 85% full charge status on your Yeti, and yet it refuses to run your cooler!

Plug your appliance into your Yeti using this cable, and the problem is solved.

98078 Cable Specifications

PORTS

Input: Anderson Power Pole

Output: Anderson Power Pole (12V, up to 15A max)

Output: Female Cigarette (12V, up to 15A max)

GENERAL

Product SKU: 98078

Cord Dims: 34 x 2.5 x 1 in (86.36 x 6.35 x 2.54 cm)

Used with: Goal Zero Yeti 1000, 1400, and 3000 Lithium Power Stations

Product Attributes

- Dimensions: 1 × 1 × 1 cm
- Weight: .4 kg
