Product Summary

A handy adaptor that changes a standard AA battery into a C cell. Ideal for radios or flashlights that need C size batteries, but you only have AA's on hand. When so many battery chargers are only capable of charging AA NiMh cells, these adaptors are your bridge to using the AAs in other electronics.

Product Description

Battery size C-Cell adaptor turns any AA battery into a 'C' cell battery. Package contains 1 adaptor.

Order 2 for your devices that use 2 C batteries, and order 3 for your lanterns, radios & flashlights that use 3 C cell batteries.

Works with NiMh rechargeables, standard alkaline, and lithium.

AA batteries not included, and we recommend the [PowerEx PreCharged](#)
