Product Summary

The Cyrix-Li-ct 12/24V-120A Intelligent Li-ion Battery Combiner by Victron is a microprocessor controlled heavy duty relay that automatically connects batteries in parallel when one of them has reached a pre-set voltage (indicating that the battery is being charged), and disconnects when the voltage decreases below float level (indicating that one or more batteries are being discharged).

Product Description

The Cyrix-Li-ct 12/24V-120A Intelligent Li-ion Battery Combiner by Victron is a microprocessor controlled heavy duty relay that automatically connects batteries in parallel when one of them has reached a pre-set voltage (indicating that the battery is being charged), and disconnects when the voltage decreases below float level (indicating that one or more batteries are being discharged).

Cyrix Battery Combiners are an excellent replacement for diode isolators. The main feature is that there is virtually no voltage loss so that the output voltage of alternators or battery chargers does not need to be increased.

Length : 5cm

Width : 7.5cm

Height : 6.5cm
