Product Summary

The easy way to put USB ports in your car's dashboard.

12-24V DC Input to Dual 5V DC USB Output (1A) can charge all USB devices including smartphones and tablets. Low profile design keeps your car dashboard tidy!

Product Description

Want a couple of USB ports in your car? This is the easy way to do it.

Simply plug this into your vehicle's power socket (CLA cigarette socket), and presto, you have reliable USB ports for your smartphones & tablets.

12-24V DC Input to Dual 5V DC USB Output (1A) can charge all USB devices including smartphones and tablets.

You can also use this converter to charge the Voltaic V15, V39, or any other USB battery pack from a 12-24V DC car charger socket power source.

Got a fussy iPhone or tablet? Get a [Smart USB Adaptor](#) and you'll be able to make sure that any USB charger will work with your device!
