### Product Summary

The Enphase Engage Cable is a continuous length of 12 AWG solar panel cable with pre-installed connectors for Enphase microinverters. Landscape solar panel orientation.

### Product Description

The Enphase Engage Cable is a continuous length of 12 AWG solar panel cable with

pre-installed connectors for Enphase microinverters.

The price indicated is per solar panel connection.

NOTE: This is the LANDSCAPE version of this cable. All connector spacings are designed to accommodate landscape orientation of solar panels. Enphase Engage cable is also available for Portrait orientations.

Enphase Engage Cable Features...

- Easy handling, just like standard electrical wire
- Can be cut, spliced and extended as needed
- Large branch capacity
- Eliminates need for additional solar panel cables, making installation quicker
- No high-voltage DC for a reduced safety risk

The Enphase Difference

Enphase is on a mission to bring solar energy to the next level, one where it's ready to meet the energy demands of an entire globe.

### **More Power From Your Solar Panels**

Enphase Microinverters get more power from the same solar panels. This means greater savings & value from your system. Each microinverter connects to a single solar panel. Unlike other types of solar inverters, if there is a shaded, dirty, or problem panel, the rest of the system keeps running smoothly. The result is increased system power yield of 3-12% over standard string inverters (according to multiple independent studies incorporating a variety of shading/soiling issues).

The Enphase Envoy shows you the status of all panels in real time.

### **Solar You Will Love**

Every part of the Enphase system is designed to have a minimal impact on your building. Wiring and equipment stay out of sight, and the low voltage AC design improves safety.

Want to start with only a few solar panels & expand in the future?

Standard string inverters require specific string sizes of panels, and have limitations on how the system can be expanded. But Enphase MicroInverters let you install as many panels as you wish, in multiple sections. The ultimate solar power system

design flexibility.

### **Reliability, Inside & Out**

Enphase products are designed to deliver more power, with less maintenance. The proof is in the longest warranties on the market. Up to 20 years.

Visit the [Enphase website](#) for more information.
