Product Summary

One of the most powerful USB battery packs we carry, with 3.5x the power in a typical smartphone. The Enerplex Jumpr Prime 10400 is happy to charge from any USB source, or any US solar panel. Like any good solar battery, the Jumpr Prime 10400 allows pass-through charging, which means that you don't have to stop charging it to charge your devices.

Product Description

One of the most powerful USB battery packs we carry, with 3.5x the power in a typical smartphone. The Enerplex Jumpr Prime 10400 is happy to charge from any USB source, or any US solar panel. Like any good solar battery, the Jumpr Prime 10400 allows pass-through charging, which means that you don't have to stop charging it to charge your devices.

Features...

The Jumpr Prime 10400 is the perfect accessory to throw in a backpack, a briefcase, or a gym bag while on the go. This portable battery is convenient when you don't have time to connect to an outlet or get a charge from the sun.

- Can charge smartphones and other small USB-enabled devices - 10,400mAh Lithium Ion Battery - Dual Charging Capabilities - Small Built-In LED Flashlight

Want to charge cameras? The best option is to use a [Universal USB camera charger](#) like the [Ansmann PL Vario](#). This will adapt to every camera battery size, and will handle 3.6/3.7V packs in addition to 7.2/7.4V packs.

Pass-Through Charging...

Here's a little feature that most USB battery pack companies don't talk about: Pass-Through charging. This is the ability of a battery pack like the Jumpr Prime to charge other devices while it is being charged. That's right... you don't need to wait until your Jumpr has adequate power before plugging in your tablet. The Jumpr Prime's advanced control circuitry will handle both for you.

All the battery packs that we sell have this feature, because they are designed to work with solar. But most big box store brands leave out this functionality.

Solar-Ready...

Want to extend the power you draw from the Jumpr Prime? Add a [USB solar panel!](#) The Jumpr Prime connects to your favourite USB solar panels, and can charge all your devices while it soaks-up power from the sun.

Jumpr Prime 10400 Specifications...

- Dimensions: 9.5 x 8.3 x 2.7cm (3.7 x 3.3 x 1.1") - Weight: 229g (0.50 lbs) - Battery Capacity: 10400 mAh - Battery Type: Lithium Ion - Recharge By:
