Product Summary

Weighing-in at 300g, it's the lightest 3.5 watts solar charger around, including solar storage battery for times when the sun isn't cooperating. No extra packaging, nylon, plastic, or marketing fluff. Lash the panel to your kayak or canoe using the included straps, and you'll be collecting electrons for your USB devices. Includes water resistant pouch for battery protection.

Product Description

Just 300g. That's all it takes to keep your phones, GPS, & headlamps charged while you're out on the water. The Kayak 3 solar charger comes with lithium battery

back-up for times when the sun isn't cooperating. No extra packaging, nylon, plastic, or marketing fluff.

Simply lash the tough encapsulated 3.5 Watt panel to your backpack using the included straps, thread the waterproof cable into your pack to the battery, and you'll be collecting electrons for all your essential USB devices like GoPro camera, GPS, phone, and more.

Being a modular system means that you can swap out the panel or the battery if you ever manage to damage either.

What will you charge?...

This ultralight Kayak 3 solar charger kit will generate up to 18 Watt-Hours per day in summer months, and store it all in a sleek lithium battery pack.

This is enough daily power to charge...

- an iPhone up to 2 times - or 40% of an iPad battery - or 2 point & shoot camera batteries - or a dSLR camera battery - or a set of NiMH AA batteries

* Actual performance depends on the number of hours the panel is exposed to direct sunlight each day.

Ready to use right out of the box.

Total Core Package weight: 300g

Be sure to check out our recommended [Universal Charger](#) options at the bottom of the page. These will enable this kit to directly charge your camera battery, AA batteries, and more.

...

The Kayak 3 Solar Panel...

- Power: 615mA @ 6V (3.69 Watts peak) - Type: Single Crystal - Manufacturer: Voltaic Systems - Mounting: Nylon pack straps attached to mounting screws on back of panel

Advantages:

- Highest efficiency, providing the most watts per square inch in direct sunlight.
- Fully encapsulated, waterproof, for all-weather use with rigid backing
