Product Summary

There are simply no other magnetic shake flashlights that compare. The Nightstar jP is made by AIT, the American company that pioneered the magnetic shake flashlight over 15 years ago. The Nightstar jP is vastly superior to any other shake flashlight in both quality & performance. A true capacitor-based shakelight with no batteries of any kind, and zero maintenance.

Product Description

The NightStar jP is the top-performing magnetic shake flashlight, designed to provide years of unfailing illumination, even in the harshest conditions. A true

capacitor-based shakelight with no batteries of any kind, and zero maintenance. Japanese components & circuitry excellence. Japanese manufacturing excellence. Like its predecessors, the Nightstar jP sets the standard in reliable, battery-free illumination.

No batteries of any kind. An LED light source that functions for decades. A completely sealed charging system with only one moving part.

It has been developed using only the best components available. AIT utilizes Japanese components, & manufactures the Nightstar jP in Japan where the highest production standards can be assured.

Perfect For: - Outdoor Recreation – Whether backpacking, boating or caving, NightStar jP can always be counted on to pierce the darkness. - Emergency Preparedness – In the aftermath of severe weather, home owners may be without power for days or weeks, but those who own a NightStar jP will never be without light.

Nightstar jP Features...

- Designed for decades of use - Maintenance-free... no batteries or bulbs... ever
- Withstands extreme environments hot or cold - wet or dry - Virtually indestructible polycarbonate housing - Luminescent magnetic Reed switch - Samarium-cobalt rare earth charging magnet and mag-lev recoil magnets will maintain magnetic field strength for centuries - Panasonic 1.5 farad gold film capacitor holds an electrical charge for months - Extensively tested by independent laboratories - Superior performance and attention to manufacturing quality control separates NightStar jP from everyone else

Nightstar jP Performance Specs...

Illumination Range

50-ft (15m) Beam size:12-ft (3.6m)

Lumen Output

15 lumens

Led Power

0.10 watts

Charging Time

30 seconds

Light duration

15 min

Waterproof

200-ft (61m)

Corrosion Proof

Motor oil, Diesel fuel, Salt Water, Mild Acids

Impact Strength

Withstands 5-ft(1.5m)drops

Storage Temp

-40F (-40c) to +140F (+70c)

Capacitor Cycle Life

100,000 charges

LED Life

50,000 hours

Size

Length:10"(25cm),Diameter:1.5"(3.8cm)

Weight

11oz (308 grams)

Warranty

5 years

Product Code

NSJP0608

Product Attributes

- Dimensions: N/A
- Weight: 0.3 kg
