### Product Summary

Ample power to go, plus the ability to operate an AC inverter... for those times when you need portable household AC power. 120 Watt-Hours of durable capacity (based on 50% DOD)

### Product Description

Choose a Battery & Option Package...

**Battery Only** A durable 12V DC battery **Includes...** 20Ahr SLA battery

**Battery with Input/Output Connectors** The basic battery wired with a male 12V input cable, and a fused 12V CLA socket. **Includes...** 20Ahr AGM Sealed Lead-Acid battery 12VDC CLA outlet (fused) 12VDC input cable

**Battery with Solar Input Regulation & Connectors** The battery wired with solar charge controller, input plug, output socket **Includes...** 20Ahr AGM battery 6A/100W solar input charge controller 12VDC CLA outlet (fused) 12VDC input cable

Specifications...

**Charging System:** 12V vehicle charging cable or solar panel options are available.

Battery: Sealed lead acid AGM Capacity: 18 Ahr

DC Output: Single 12V CLA socket

**Dimensions:** 7 x 3 x 6.7" / 17.8 x 7.6 x 17cm Weight: 11.2 lbs (5.1kg)

Power storage...

The Outpost Power 20 includes a durable 20 amp-hour sealed lead acid battery with AGM construction for reliable service in a broad range of temperatures & long life - longer than gel cell batteries. This type of battery will lose very little power during times of storage & transport. It has enough guts to drive a small AC inverter like the recommended Smart AC 150 Dual. Plus you now have the ability to charge the unit from your vehicle outlet on your way to the trailhead.

As non-spillable, sealed batteries, the kits are not regulated for air travel, so take your OP-18 kit with you overseas. MSDS information is available upon request.

DC Outlet option...

The Outpost Power 20 is available with a standard DC CLA outlet socket (like in your car), plus charging cable for charging from your vehicle outlet or solar panel. An AC wall charger is not provided.

Flexible charging options...

When driving to the trailhead, you can top-up the battery charge by plugging the Outpost Power kit into the cigarette socket in your vehicle (optional for the CLA pack). If you plan to be away from any charging source for several days, take along one of our compact folding solar panels (30 Watt) to help offset your power usage. We recommend selecting the solar charge controller option if you plan to connect to a solar panel of more than 10 Watts for any length of time.

#### Who's buying?...

The Outpost Power line of portable power solutions have been designed for, and are used by researchers, rural 3rd world educators, relief workers, medical teams, search & rescue, hunters, sportsmen, journalists, and anyone else who needs reliable power beyond the reach of an extension cord.
