Product Summary

Need a small solar storage battery, and want something more durable than lithium, and at a much lower price? This OP-4 battery pack stores 25 watt-hours of power (50% DOD). Also a popular size with camping lanterns.

Product Description

Choose a Battery & Option Package...

Battery Only A durable 12V DC battery **Includes...** 4.5Ahr SLA battery with fast tab connectors

Battery with Input/Output Connectors The basic battery wired with a male 12V input cable, and a fused 12V CLA socket. **Includes...** 4.5Ahr AGM battery 12VDC CLA outlet (fused)

Specifications...

Charging System: 12V vehicle charging cable or solar panel options are available. See the accessories tab.

Battery: Sealed lead acid AGM Capacity: 4.5 Ahr

Dimensions: 3.5 x 2.75 x 4" (w x d x h) 8.9 x 7 x 10.1cm Weight: 3.5 lbs (1.6kg)

Power storage...

The Outpost Power 4 includes a compact 4.5 amp-hour sealed lead acid battery with AGM construction for reliable service in a broad range of temperatures & long life - longer than gel cell batteries. This type of battery will lose very little power during times of storage & transport. It has enough reserve power to run a standard handheld GPS unit for almost 54 hours - almost 5 times the run time provided by a set of AA batteries. Plus you now have the ability to charge the unit from your vehicle outlet on your way to the trailhead.

As non-spillable, sealed batteries, the kits are not regulated for air travel, so take your OP-4 kit with you overseas.

MSDS information is available upon request.

DC Outlet option...

A standard DC CLA outlet socket (like in your car), is available as an option. See the order form. See the 'Accessories'

tab for these options.

Flexible charging options...

An AC wall charger is not provided. When driving to the trailhead, you can top-up the battery charge by plugging the Outpost Power kit into the cigarette socket in your vehicle (optional). If you plan to be away from any charging source for several days, take along one of our compact folding solar panels (5 Watt) to help offset your power usage.

Who's buying?...

The Outpost Power line of portable power solutions have been designed for, and are used by researchers, rural 3rd world educators, relief workers, medical teams, search & rescue, hunters, sportsmen, journalists, and anyone else who needs reliable power beyond the reach of an extension cord.
