Product Summary

There are lots of chargers available for your AA & AAA rechargeable batteries, but precious few that offer 4 individual charging channels with adjustable charging rates & programs, plus USB output from your batteries. The Powerline 4 Pro is a compact mobile charging solution for world travellers.
MSRP : $69

Product Description

There are lots of chargers available for your AA & AAA rechargeable batteries, but precious few that offer 4 individual charging channels with adjustable charging rates & programs, plus USB output from your batteries. The Powerline 4 Pro is a compact mobile charging solution for world travellers.
Batteries NOT included.
This completely programmable charger will charge, refresh and test cells individually. It provides a true digital read-out of capacity of individual cells in milli-amp hours so you always know how much battery life is available. Variable refresh function for optimum battery life.
Also includes 1 Amp USB charger for smartphones and USB devices, Apple, Samsung, Blackberry, etc., drawing power from the AA batteries in the charger.
THIS CHARGER IS A "MUST" FOR ANY SERIOUS TRAVELLER & USER OF RECHARGEABLE BATTERIES.
Ansmann Powerline 4 Pro Features...

- Adjustable charging currents from 400 - 1800 mA - Capacity measurement in mAh for each cell - 4 selectable charging programs, intelligent auto cut-off charge function - LCD Display fo Voltage, current, capacity and time - Individual supervision of each cell, trickle charge, faulty cell detection Check out the deals on low-self-discharge NiMh batteries]

Charging Programs...

- Charge (default is 600mA) - Discharge (discharges, then charges to minimize 'memory effect' of batteries) - Refresh (Cycle of charging & discharging to refresh old batteries) - Test (Fully charge, discharge, then charge again to fully measure battery capacity)

Powerline 4 Pro Specifications...
Chargeable cells : AA / AAA / USB (all types)
Input voltage : 100-240V AC, 12V DC
Worldwide use : Yes

LCD display : Yes
Individual supervision of cells : Yes
Over-charging protection (trickle charge) : Yes
Faulty cell detection : Yes
Microprocessor control : Yes
Temperature control : Yes
Safety timer : Yes
Charging current Micro AAA : 400/600/800mA (1-4)
Charging current Mignon AA : 400/600/800mA (1-4), 1500/1800mA (1-2)
Current output through USB port : 1000mA
