The Sherpa 100PD is designed for people who need dependable power for USB-C devices like the latest laptops, tablets, and phones. Its USB-C Power Delivery output delivers up to 60W, which makes it more compatible with more electronics. The Sherpa 100PD also features wireless Qi charging.

Product Description

The Sherpa 100PD Power Bank by Goal Zero allows you to charge-up without the bulk. The Sherpa 100PD is designed for people who need dependable power for USB-C devices like the latest laptops, tablets, and phones. Its USB-C Power Delivery output delivers up to 60W, which makes it more compatible with more electronics. The Sherpa 100PD also features wireless Qi charging.

Part number : 22060 [Comparing this vs the Sherpa 100AC?](#)]

They are very similar. The 100PD is smaller, lighter, offers the same capacity, but no AC output. The [100AC](#)] model includes a built-in AC inverter for household AC power output.

Sherpa 100PD Features

Airline approved, travel ready

Lightweight, sleek design fits easily into packs, bags, and camera cases. Ideal for travel where space is limited.

Charge quickly on the move

Fast-charging Power Delivery gives you more power in less time. Charge USB-C laptops, phones, and tablets using the 60W USB-C Power Delivery port. Learn about PD charging.

Ditch the cables if you can

Charge your Qi-compatible phone from the integrated Qi charging pad for an entirely wireless experience.

No device left behind

Two 2.4A USB ports are useful for devices with proprietary charging, such as fitness trackers, gps devices, and micro/lightning phones.

Charging The Sherpa 100PD

The Sherpa 100PD can charge from any USB source, including laptops, wall chargers, and USB solar panels (any brand).

(note that the following quoted times are from 'empty', which is a state-of-charge

we NEVER recommend for any battery pack. Keep your batteries in the top 50% of 'full' for the best performance & lifetime)

USB-C PD (60W): 2.5 hrs

Wall Charger (45W): 3 hrs

USB-A (2.4A): 9 hrs

Nomad 14 Solar (14W): 12-28 hrs

Nomad 28 Solar (28W): 6-14 hrs
