Product Summary

The MorningStar SunSaver 10 solar charge controller. The world's leading small system solar regulator. Choose from one of several models & wiring options.

Product Description

The MorningStar SunSaver 10 solar charge controller. The world's leading small system solar regulator. Choose from the standard 12V unit with temperature compensation, or add a low voltage disconnect. The 24V model offers both temperature compensation & low voltage disconnect. You also have the option of having any model pre-wired with waterproof Powerfilm solar panel connectors.

MorningStar's SunSaver® is the world's leading small solar controller for both professional and consumer applications including standard features and capabilities not found in any other small PV controller.

Key Features and Benefits

- 100% solid state
- Series design (not shunt)
- True 0 to 100% PWM duty cycle
- Setpoint accuracy 12V: +/-25mV
- Fully encapsulated in epoxy potting
- Marine rated terminals / anodized case
- Temperature compensation
- Sealed / Flooded battery select
- Parallel for 40 amps or more

5-year warranty

Models:

SSL-10-12V (TC or TC/LVD) SSL-10-24V (TC/LVD)

*ask for pricing on Temperature Compensation &/or Low Voltage Disconnect
