### Product Summary

This USB Charger for Canon LP-E6 Battery will charge your Canon 5D Mark II / Mark III and EOS 60D camera batteries (plus any LP-E6 variants) from any USB port including USB solar chargers and battery packs. Fast charging with up to 800mA output into camera battery. MicroUSB charging cable included.

### Product Description

This USB Charger for Canon LP-E6 Battery will charge your Canon 5D Mark II / Mark III and EOS 60D camera batteries from any USB port including USB solar chargers

and battery packs (partial compatibility list below). Fast charging with up to 800mA output into camera battery. MicroUSB charging cable included.

Unlike the Canon LP-E6 charger that came with your Canon camera, this generic USB charger offers far more versatility for people on the go. This USB Canon LP-E6 charger is small & light, and easy to pack along - it's only about the size of a stack of business cards, and weighs next to nothing.

**Canon Compatibility... Canon:** EOS 6D / 7D, EOS 60D / 70D, EOS 5D Mark II / Mark III, plus others.

All LP-E6 battery variations

### **Using Generic Chargers with Canon-branded batteries...**

This charger will charge Canon batteries, and 3rd party battery packs. Depending on your camera body, the battery status information may or may not get updated (Canon-branded functionality).

Using with solar

Simply plug the charger's USB cable into any USB solar panel & place the panel in sunlight. Note that for solar-direct use, a panel of 5 watts or more is recommended for reasonable charging times.

Don't want to be at the mercy of the sun? Simply put a battery pack between the solar panel & this charger. Using an intermediate solar storage battery pack will capture & store more of the solar power and allow the charger to operate at full speed whenever you need to use it... day or night.

Specifications

Charging (red) & completed (blue) indicator lights

**Input :** 5V USB
