Product Summary

When it comes to packable solar battery packs to support all small electronics up to & including laptops, it doesn't get any better than the Voltaic V88. This lightweight 24,000 mAh / 88 Wh laptop battery pack will power most laptops (including MacBooks with optional adapter), tablets, smartphones and digital cameras.

Product Description

When it comes to packable solar battery packs to support all small electronics up to & including laptops, it doesn't get any better than the Voltaic V88. This lightweight 24,000 mAh / 88 Wh laptop battery pack will power most laptops (including MacBooks with optional adapter), tablets, smartphones and digital cameras.

NOTE: This is the last of the early models without USB-C PD functionality (USB-C, but no PD). Hence the discount.

If you're always on the move, needing additional portable power for all your personal electronics, the V88 is your answer. Forget the wall adaptor, running straight from battery to device is far more efficient. Inverters in other battery packs of this size range waste 20-30% of your energy in creating household AC power that your devices convert back to DC anyway. With all the V88's output settings, full-power USB ports, and comprehensive collection of connectors, you have all your needs covered.

Voltaic V88 Features - Optimized For Solar Charging - Hi-Voltage Laptop Port (12V, 16V, 19V Or 24V) - USB Quick Charge And USB-C Port (5V/2A) - Included AC Charger And DC Car Charger

Connects to all major brands & models of laptop (MacBook [MagSafe 1](#)] & [Magsafe 2](#)], [MS Surface 2](#)] & [Surface 3/4](#)] available separately)

- USB-C charger option available **How Does It Work?**

The V88 plugs into any "18V" Voltaic solar panel, and many non-Voltaic panels (like [P3](#)] & [Powerfilm](#)]) that provide either a 5.5x2.1mm barrel connector, or a female car CLA (cigarette) socket. You can also charge from your vehicle using the included 12V input plug. Or charge your V88 from any wall outlet.

The battery provides regulated power to a variety of devices.

USB Devices : Use the V88's USB & USB-c ports like you would any other

12V, 16V, 19V, & 24V Devices : Set the output voltage, plug in your device via one of the V88's connector tips & output cable, or use the 12V car socket.

Throughput charging! You can charge your device while the V88 is charging.

Charge multiple devices at once! : The USB ports are not affected by other port settings, so go ahead and charge your phone or tablet at the same time as your laptop.

Voltaic V88 Specifications V88 Laptop Battery - Capacity: 24,000 mAh / 88.8 Watt Hours - Output: 5V/2A USB, 5V/3A USB-C, and 12V/6A, 16V/5A, 19V/4.5A, 24V 3.5A - Input: 14-25V, 3A (75W) - Battery Type: Li-Polymer - Protection: Short Circuit, Over Charge, Over Discharge, Over Current, Over Temperature
Size and Weight - 1.5 pounds (702g) - 21.8cm x 13.7cm x 2.2cm **Charge Time** - 2.5-3 hours from included AC charger **Battery Functions:** - DC Input to charge Voltaic battery - USB Quick Charge Output - USB C Output - DC Output 12-24V

Included in the battery kit...

- V88 Laptop Battery - Car Charger Socket - (5.5 x 2.5mm) charges devices that have a car charger - Standard Laptop Adapters (Optional adapters available for purchase) - Laptop Output Cable - connects to Laptop Adapters - AC Charger - charges V72 battery from AC - 12V DC Car Charger - charges V72 battery from DC (car)
