Product Summary

For Ironridge XR-1000 Rails, the XR1000 BOSS (Bonded Structural Splice) rail splice provides a completely seamless, secret attachment. No assembly, tools, or hardware required. The built-in bonding spring has teeth that bite into rail, creating a connection that meets all UL standards.

Product Description

For Ironridge XR-1000 Rails, the XR1000 BOSS (Bonded Structural Splice) rail splice provides a completely seamless, secret attachment. No assembly, tools, or hardware required. The built-in bonding spring has teeth that bite into rail, creating a connection that meets all UL standards.

The BOSS™ eliminates restrictions around splice locations. Place it anywhere along the span (except the outside cantilever). Available now, so you can continue to conquer your solar projects!
